SI. VIIUS BANCE. A Physician Prescribes Dr. Miles' Restorative Nervine.

Dr. Miles Medical Co., Elkhart, Ind.: My daughter Mattle, aged 14, was afflicted last spring with St. Vitus dance and ner-volumess, her entire right side was numb and nearly paralyzed. We consulted a phy-

sician and he prescribed Dr. Miles' Restora-tive Nervine. She took three bottles before we saw any certain signs of improvement, but after that she began to improve very fast and I now think she is entirely cured. She has taken nine bottles of the Nervine, but no other medicine of any kind. Knox, Ind., Jan. 5, '95. H. W. HOSTETTER.

The Most Important Session Since 1867. The Manitoba School Question.

OTTAWA, Ont., Jan. 2 .- What prom

ises to be the most important session of

dominion parliament to aid the Manitoba Catholics.

It is on this question that the fate of
the present conservative government
hinges. Ontario members who represent Protestant constituencies and of
whom there are 92, cannot vote for the
re-establishment of Catholic schools
and be re-elected. In the last four byeelections three opposition candidates
have been returned and as indications
show, the government will be defeated
in the house in the coming session if
they carry out their promise to bring in
a bill that will supersede the Manitoba
legislature's act and that will re-establish Roman Catholic schools. The population of Manitoba is 200,000, of whom
only 20,000 are Roman Catholics.

The Detroit War.

DETROIT, Jan. 2.—Mayor Pingree today showed his hand in a new plan to
require the Citizens' street rallway to
grant universal transfers upon eightfor-a-quarter tickets. The mayor had
petitioned the circuit court a week ago
to compet the company to resume the
sale of the six-for-a-quarter tickets,
with transfer privileges, which the company sold voluntarily hast summer, but
which were discontinued because the
city government had refused to grant
extensions of franchises and other favora to the company. To-day this petition was amended so as to require the
Citizens' company to farmish transfers
which latter are being sold temporarily
by the company as a test of a new ordinance. The mayor hopes, through the
courts, to force the company into granting what would be uncertain of accompilabment by means of an ordinance to
the same effect.

this morning. Death was due to strangulation.

On Monday morning. May 7, 1894, Woodley, who had been drinking for several days, called at the home of his sweetheart. After smoking a cigar with her father, he went into the kitchen where the young woman was preparing a meal. Three minutes later two shots were heard and when the father reached the kitchen he found the couple lying unconscious on the floor with bullet wounds in their heads.

The young woman died in a few minutes, but Woodley recovered. He admitted the killing and said he was Jealous. His trial followed in July and he was convicted of murder in the first degree. Five times he was respited, but finally to-day explated his crime on the scaffold.

attained through a knowledge that the body is free from any restraint or obligation to the United States government which has created it. Our government will occupy the status of an exact neutral in the proceedings.

The state department will lend such assistance as may be required to facilitate the work of the commission in procuring transportation for it, on a United States warship, if that is desired, and in supplying any records in its possession that may be called for. But it will not allow itself to be placed in the position of taking sides as to the merits of the controversy between Great Britain and Venezuela. It will not undertake to present the Venezuelan case, one will it even endeavor to offset any evidence that leans towards the British contention. Therefore, the various suggestions that have been made to the department by individuals in this country as to where evidence can be secured have been ignored. Such matter is regarded as proper for the consideration of the commission, but is not for the state department. It is pointed out that in this attitude the state department is exactly consistent with its course in the past. From the beginning of the flegotiations with Great Britain touching the Venezuelan boundary, the United States government has expressly refrained from committing itself to a recognition of the justice of Venezuelas claim, and has limited itself strictly to the contention that this was proper matter for settlement by arbitration. Moreover the attitude which the department has assumed towards the commission itself is regarded as a sufficient negative to the assumption in Europe that the United States government purposed constituting itself to a restrict the assumption in Europe that the United States government purposed constituting itself to a restrict the assumption in surface of the assumption in surface as a sufficient negative to the assumption in the surface as a sufficient negative to the assumption in the surface as a sufficient negative to the assumption in the surface as

ises to be the most important session of the Canadian parliament since 1867, when the provinces were confederated, opened to-day. On the question of the schools in Manitoba, the government is so seriously divided as to jeopardize its stability. In 1890, the legislature of Manitoba pussed a bill abolishing the separate schools for Catholic children. The hierarchy of the province appealed against the bill to the imperial privy council, the highest court in the British empire. The privy council decided that the legislature of Manitoba was acting within its rights in passing the bill for the abolishment of separate yeahools, but last winter another appeal was taken on the ground that certain rights held by the province at the time of its entering the dominion confederation had been violated. This appeal resulted in the imperial privy council leaving discretionary power with the dominion parliament to add the Manitoba Catholics. Markets.

In common with all of the other financial markets, the stock speculation was contracted by expectation of the new government bond issue and by a monetary condition that allows of the importation and exportation of gold at the same time and at a profit in either transaction. Of course the import of gold and the premium now reported to be ruling on the yellow metal are made profitable only on account of the forthcoming bond issue. The bonds according to the general impression will be sold at so low a rate as to abundantly justify the payment of a stiff premium for the gold to be turned into the treasury in exchange therefor. The exports of gold, though profitable at ruling figures, would be less remunerative.
